Restrictions on use : Do not use product for anything outside of the above specified uses
Manufacturer/Supplier : The Chemours Company FC, LLC
                      : 1007 Market Street
                      : Wilmington, DE 19899
                      : United States of America

Product Information : 1-844-773-CHEM (outside the U.S. 1-302-773-1000)
Transport Emergency : CHEMTREC: +1-800-424-9300 (outside the U.S. +1-703-527-3887)
Other information : The above components represent Chemours Refrigerant and Refrigerant Blends that are returned for reclamation. Any (and/or all) components may be contained in the material returned. The information is representative for any and all components.
                      This specification for used refrigerant returned for reclamation is a maximum of 30% TOTAL lubricating oil content. Most used refrigerant contains significantly less.

SECTION 2. HAZARDS IDENTIFICATION

Product hazard category
  Gases under pressure  Compressed gas
  Gases under pressure  Liquefied gas
  Category 2A

2 / 55
Used Refrigerants and Refrigerant Blends

Version 3.1

Revision Date 01/13/2017

Ref. 130000120029

Label content

Pictogram:

- Contains gas under pressure; may explode if heated.
- May cause respiratory irritation.
- May cause drowsiness or dizziness.

Signal word: Warning
Hazardous prevention measures:

- Obtain special instructions before use. Do not handle until all safety precautions have been read and understood.
- Do not breathe dust/ fume/ gas/ mist/ vapours/ spray.
- Wash skin thoroughly after handling.
- Do not eat, drink or smoke when using this product.
- Use only outdoors or in a well-ventilated area.
- Avoid release to the environment.
- Wear protective gloves/ protective clothing/ eye protection/ face protection.
- IF SWALLOWED: Immediately call a POISON CENTER or doctor/ physician.
- IF ON SKIN: Wash with plenty of soap and water.
- IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Immediately call a POISON CENTER or doctor/ physician.
- IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor/ physician.
- IF exposed or concerned: Get medical advice/ attention.
- Specific treatment (see supplemental first aid instructions on this label).
- Rinse mouth.
- If skin irritation occurs: Get medical advice/ attention.
- If eye irritation persists: Get medical advice/ attention.
- Take off contaminated clothing and wash it before reuse.
- Store in a well-ventilated place. Keep container tightly closed.
- Store locked up.
- Protect from sunlight. Store in a well-ventilated place.
- Dispose of contents/ container to an approved waste disposal plant.

Other hazards:

Misuse or intentional inhalation abuse may cause death without warning symptoms, due to cardiac effects. May cause cardiac arrhythmia. Vapours are heavier than air and can cause suffocation by reducing oxygen available for breathing. Rapid evaporation of the liquid may cause frostbite. Lubricants can cause skin irritation.

### SECTION 4. FIRST AID MEASURES

**General advice**: When symptoms persist or in all cases of doubt seek medical advice.
Used Refrigerants and Refrigerant Blends

Inhalation : Remove from exposure, lie down. Move to fresh air. Keep patient warm and at rest. Artificial respiration and/or oxygen may be necessary. Consult a physician.

Skin contact : Flush area with lukewarm water. Do not use hot water. If frostbite has occurred, call a physician.

Eye contact : In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Consult a physician if necessary.

Ingestion : Do not induce vomiting. If conscious, give 2 glasses of water. Get immediate medical attention. Never give anything by mouth to an unconscious person.

Most important symptoms/effects, acute and delayed : Anaesthetic effects Light-headedness irregular heartbeat with a strange sensation in the chest, heart thumping, apprehension, feeling of fainting, dizziness or weakness

Protection of first-aiders : If potential for exposure exists refer to Section 8 for specific personal protective equipment.

Notes to physician : Because of possible disturbances of cardiac rhythm, catecholamine drugs, such as epinephrine, that may be used in situations of emergency life support should be used with special caution.

SECTION 5. FIREFIGHTING MEASURES

Suitable extinguishing media : As appropriate for combustibles in area. Extinguishant for other burning material in area is sufficient to stop burning.

Unsuitable extinguishing media : No applicable data available.

Specific hazards : Drums may rupture under fire conditions. Cylinders are equipped with pressure and temperature relief devices, but may still rupture under fire conditions. Decomposition may occur.
Used Refrigerants and Refrigerant Blends

Version 3.1

Revision Date 01/13/2017

Ref. 130000120029

Special protective equipment for firefighters: No applicable data available.

Further information: Use water spray or fog to protect the fire fighters and to cool container. Self-contained breathing apparatus (SCBA) is required if containers rupture and contents are released under fire conditions.

SECTION 6. ACCIDENTAL RELEASE MEASURES

NOTE: Review FIRE FIGHTING MEASURES and HANDLING (PERSONNEL) sections before proceeding with clean-up. Use appropriate PERSONAL PROTECTIVE EQUIPMENT during clean-up.

Safeguards (Personnel): Ventilate spill area. Comply with Federal, State and Local regulations on reporting releases

Environmental precautions: Prevent material from entering sewers, waterways, or low areas.

Spill Cleanup: Dike spill. Collect on absorbent material and transfer to steel drums for recovery/disposal.

Accidental Release Measures: Self-contained breathing apparatus (SCBA) is required if a large release occurs.

SECTION 7. HANDLING AND STORAGE

Handling (Personnel): Avoid breathing vapours or mist. Avoid contact with skin, eyes and clothing. Wash thoroughly after handling. Use sufficient ventilation to keep employee exposure below recommended limits.

Handling (Physical Aspects): No applicable data available.

Dust explosion class: Not applicable

Storage: Keep containers tightly closed and in an upright position. Store in a clean, dry place. Keep away from direct sunlight. Do not expose recovery cylinders to temperature above 52°C (125°F). Do not expose drums to direct heat or
temperature above 46°C (115°F) to avoid pressurizing and possibly distorting the drums. The product has an indefinite shelf life when stored properly.

Storage period : > 10 yr

Storage temperature : < 52 °C (< 126 °F)

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering controls : Normal ventilation for standard manufacturing procedures is generally adequate. Local exhaust should be used when large amounts are released. Mechanical ventilation should be used in low or enclosed places.

Personal protective equipment

Respiratory protection : Where there is potential for airborne exposures in excess of applicable limits, wear NIOSH approved respiratory protection.

Hand protection : Additional protection: Impervious gloves

Eye protection : Wear safety glasses with side shields. Additionally wear a face shield where the possibility exists for face contact due to splashing, spraying or airborne contact with this material.

Exposure Guidelines

Exposure Limit Values

- Dichlorodifluoromethane (CFC-12)
  - Permissible exposure limit: 1,000 ppm 4,950 mg/m³ 8 hr. TWA
  - TLV (OSHA) 1,000 ppm
  - TLV (ACGIH) 1,000 ppm TWA

- Trichlorofluoromethane (CFC-11)
  - Permissible exposure limit: 1,000 ppm 5,600 mg/m³ 8 hr. TWA
  - TLV (OSHA) 1,000 ppm
  - TLV (ACGIH) 1,000 ppm TLV-C
1,1,1,2-Tetrafluoroethane (HFC-134a)
No applicable data available.

1-Chloro-1,1-difluoroethane (HCFC-142b)
No applicable data available.

2,2-Dichloro-1,1,1-trifluoroethane (HCFC-123)
No applicable data available.

Chlorotrifluoromethane (CFC-13)
No applicable data available.

Chlorodifluoromethane (HCFC-22)
TLV (ACGIH) 1,000 ppm TWA

2-Chloro-1,1,1,2-tetrafluoroethane (HCFC-124)
No applicable data available.

Trichlorotrifluoroethane (CFC-113A)
No applicable data available.

1,2-Dichloro-1,1,2,2-tetrafluoroethane (CFC-114)
Permissible exposure limit: (OSHA) 1,000 ppm 7,000 mg/m3 8 hr. TWA
TLV (ACGIH) 1,000 ppm TWA

Pentafluoroethane (HFC-125)
No applicable data available.

1,1,1-Trifluoroethane (HFC-143a)

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance
Physical state : gaseous
Form : liquid, Compressed gas, Liquefied gas
Color : clear, colourless, light yellow

Odor : slight
Odor threshold : No applicable data available.

pH : No applicable data available.

Melting point/range : No applicable data available.

Boiling point/boiling range : No applicable data available.

Flash point : Pure refrigerants will not burn. However, the lubricating oil contaminants will burn and they may be at a high enough concentration that the mixture will burn.

Evaporation rate : No applicable data available.

Flammability (solid, gas) : No applicable data available.

Upper explosion limit : No applicable data available.
Used Refrigerants and Refrigerant Blends

Version 3.1

Revision Date 01/13/2017     Ref. 130000120029

- Lower explosion limit: No applicable data available.
- Vapor pressure: No data available.
- Vapour density: No applicable data available.
- Specific gravity (Relative density): No data available.
- Water solubility: No data available.
- Solubility(ies): No applicable data available.
- Partition coefficient: n-octanol/water: No applicable data available.
- Auto-ignition temperature: No applicable data available.
- Decomposition temperature: No applicable data available.
- Viscosity, kinematic: No applicable data available.
- Viscosity, dynamic: No applicable data available.

SECTION 10. STABILITY AND REACTIVITY

- Reactivity: No applicable data available.
- Chemical stability: Stable.
- Possibility of hazardous reactions: Polymerization will not occur.
- Conditions to avoid: Avoid open flames and high temperatures.
- Incompatible materials: Alkali metals Alkaline earth metals, Powdered metals, Powdered metal salts, The Refined Mineral Oils are incompatible with strong oxidizers.
- Hazardous decomposition products: Decomposition products are hazardous. This material can be decomposed by high temperatures (open flames, glowing metal surfaces, etc.) forming hydrochloric and hydrofluoric acids, and possibly carbonyl halides. Refined
Safety Data Sheet

**Used Refrigerants and Refrigerant Blends**

**Version 3.1**

**Revision Date 01/13/2017**

Mineral Oils, if present, can produce carbon monoxide and carbon dioxide upon combustion.

equal to or above those causing maternal toxicity.

further information:

-cardiac sensitisation threshold limit: 175000 mg/m3

1,1,1,2-tetrafluoroethane (hfc-134a)

inhalation 4 h lc50: > 567000 ppm, rat

inhalation no observed adverse effect concentration: 40000 ppm, dog

-cardiac sensitization

inhalation low observed adverse effect concentration (loaec): 80000 ppm, dog

-cardiac sensitization

skin irritation: no skin irritation, rabbit

eye irritation: no eye irritation, rabbit

skin sensitization: does not cause skin sensitisation, guinea pig

-does not cause respiratory sensitisation, rat

repeated dose toxicity:

inhalation rat

gas

noaël: 50000

-no toxicologically significant effects were found.

carcinogenicity: not classifiable as a human carcinogen.

overall weight of evidence indicates that the substance is not carcinogenic.

mutagenicity: animal testing did not show any mutagenic effects.

tests on bacterial or mammalian cell cultures did not show mutagenic effects.

reproductive toxicity: no toxicity to reproduction

-no effects on or via lactation

animal testing showed no reproductive toxicity.
Used Refrigerants and Refrigerant Blends

Teratogenicity: Animal testing showed no developmental toxicity.

Further information: Cardiac sensitisation threshold limit: 334000 mg/m³

Pentafluoroethane (HFC-125)
Inhalation 4 h LC50: > 80000 ppm, Rat

Inhalation No Observed Adverse Effect Concentration:
75000 ppm, Dog
Cardiac sensitization

Inhalation Low Observed Adverse Effect Concentration (LOAEC):
100000 ppm, Dog
Cardiac sensitization

Skin sensitization: Does not cause respiratory sensitisation, human

Repeated dose toxicity: Inhalation
- Rat gas
No toxicologically significant effects were found.

Carcinogenicity: Not classifiable as a human carcinogen. Overall weight of evidence indicates that the substance is not carcinogenic.

Mutagenicity: Animal testing did not show any mutagenic effects. Evidence suggests this substance does not cause genetic damage in cultured mammalian cells. Did not cause genetic damage in cultured bacterial cells.

Reproductive toxicity: No toxicity to reproduction
Animal testing showed no reproductive toxicity.

Teratogenicity: Animal testing showed no developmental toxicity.

Further information: Cardiac sensitisation threshold limit: 490000 mg/m³

Difluoromethane (HFC-32)
Inhalation 4 h LC50: > 520000 ppm, Rat
Inhalation Low Observed Adverse Effect Concentration (LOAEC): > 350000 ppm, Dog Cardiac sensitization

Inhalation No Observed Adverse Effect Concentration: 350000 ppm, Dog Cardiac sensitization

Skin irritation: No skin irritation, Not tested on animals
Not expected to cause skin irritation based on expert review of the properties of the substance.

Eye irritation: No eye irritation, Not tested on animals
Not expected to cause eye irritation based on expert review of the properties of the substance.

Skin sensitization: Does not cause skin sensitisation., Not tested on animals
Not expected to cause sensitization based on expert review of the properties of the substance.

There are no reports of human respiratory sensitization.

Repeated dose toxicity: Inhalation Rat
No toxicologically significant effects were found.

Mutagenicity: Animal testing did not show any mutagenic effects. Tests on bacterial or mammalian cell cultures did not show mutagenic effects.

Reproductive toxicity: No toxicity to reproduction Animal testing showed no reproductive toxicity. Information given is based on data obtained from similar substances.

Teratogenicity: Animal testing showed no developmental toxicity.

Further information: Cardiac sensitisation threshold limit: > 735000 mg/m3

2-Chloro-1,1,2-tetrafluoroethane (HCFC-124)
Inhalation 4 h LC50: > 230000 ppm, Rat Anaesthetic effects
Central nervous system effects

Inhalation Low Observed Adverse Effect Concentration (LOAEC) : 25000 ppm, Dog Cardiac sensitization

Inhalation No Observed Adverse Effect Concentration : 10000 ppm, Dog Cardiac sensitization

Skin irritation : Not expected to cause skin irritation based on expert review of the properties of the substance.

Eye irritation : Not expected to cause eye irritation based on expert review of the properties of the substance.

Skin sensitization : Not expected to cause sensitization based on expert review of the properties of the substance.

Does not cause respiratory sensitisation.

There are no reports of human respiratory sensitization.

Repeated dose toxicity : Inhalation multiple species

- No toxicologically significant effects were found.

Carcinogenicity : Not classifiable as a human carcinogen.

Mutagenicity : Tests on bacterial or mammalian cell cultures did not show mutagenic effects.

Animal testing did not show any mutagenic effects.

Teratogenicity : Animal testing showed no developmental toxicity.

Further information : Cardiac sensitisation threshold limit : 140000 mg/m3

Trifluoromethane (HFC-23) Inhalation 4 h LC50 : > 663000 ppm, Rat

Inhalation Low Observed Adverse Effect : > 500000 ppm, Dog Cardiac sensitization
**Concentration (LOAEC)**

**Inhalation No Observed Adverse Effect Concentration**

- 500000 ppm, Dog Cardiac sensitization

**Repeated dose toxicity**

- Inhalation Rat
  - NOAEL: 28.634 mg/l
  - No toxicologically significant effects were found.

**Mutagenicity**

- Animal testing did not show any mutagenic effects. Evidence suggests this substance does not cause genetic damage in animals.

**Reproductive toxicity**

- No toxicity to reproduction Evidence suggests the substance is not a reproductive toxin in animals.

**Teratogenicity**

- Animal testing showed no developmental toxicity.

**Further information**

- Cardiac sensitisation threshold limit: > 172414 mg/m3

**2,2-Dichloro-1,1,1-trifluoroethane (HCFC-123)**

**Inhalation**

- Target Organs: Central nervous system Central nervous system effects

**Inhalation Low Observed Adverse Effect Concentration (LOAEC)**

- 20000 ppm, Dog Cardiac sensitization
- 10000 ppm, Dog Cardiac sensitization

**Dermal LD50**

- > 2,000 mg/kg, Rabbit

**Dermal LD50**

- > 2,000 mg/kg, Rat

**Oral LD50**

- 9,000 mg/kg, Rat Respiratory effects Abnormal posture
Skin irritation : No skin irritation, Rabbit
Not expected to cause skin irritation based on expert review of the properties of the substance.

Eye irritation : No eye irritation, Rabbit
Not expected to cause eye irritation based on expert review of the properties of the substance.

Skin sensitization : Does not cause skin sensitisation., Guinea pig
Did not cause sensitisation on laboratory animals. Not expected to cause sensitization based on expert review of the properties of the substance.

Does not cause respiratory sensitisation., multiple species

Repeated dose toxicity : Inhalation
Rat
- vapour
No toxicological effects warranting significant target organ toxicity classification were seen below the recommended guidance values for classification.

Carcinogenicity : Not classifiable as a human carcinogen.
The observed tumors do not appear to be relevant for men.

Mutagenicity : Animal testing did not show any mutagenic effects.
Did not cause genetic damage in cultured bacterial cells.

Reproductive toxicity : No toxicity to reproduction
Animal testing showed no reproductive toxicity.
No effects on or via lactation

Teratogenicity : Animal testing showed no developmental toxicity.

Further information : Cardiac sensitisation threshold limit : 124000 mg/m3

1-Chloro-1,1-difluoroethane (HCFC-142b)
Inhalation 4 h LC50 : > 40000 ppm , Rat
Target Organs: Central nervous system
narcosis
Lethargy
Laboured breathing
lung effects
Kidney effects

Concentration

Skin irritation: No skin irritation, Not tested on animals
Not expected to cause skin irritation based on expert review of the properties of the substance.

Eye irritation: No eye irritation, Not tested on animals
Not expected to cause eye irritation based on expert review of the properties of the substance.

Skin sensitization: Does not cause skin sensitisation, Not tested on animals
Not expected to cause sensitization based on expert review of the properties of the substance.

There are no reports of human respiratory sensitization.

Repeated dose toxicity: Inhalation
Rat
- gas
No toxicologically significant effects were found.

Mutagenicity: Tests on bacterial or mammalian cell cultures did not show mutagenic effects.
Animal testing did not show any mutagenic effects.

Reproductive toxicity: No toxicity to reproduction
Evidence suggests the substance is not a reproductive toxin in animals.

Teratogenicity: Animal testing showed no developmental toxicity.

Further information: Cardiac sensitisation threshold limit: 932751 mg/m3

2,3,3,3-Tetrafluoropropene (HFO-1234yf)
Inhalation 4 h LC50: > 405000 ppm, Rat

Inhalation Low Observed Adverse Effect: > 120000 ppm, Dog
Cardiac sensitization
Concentration (LOAEC)  
Inhalation No Observed Adverse Effect Concentration  
Skin irritation  
: 120000 ppm, Dog Cardiac sensitization 
: No skin irritation, Not tested on animals  
Not expected to cause skin irritation based on expert review of the properties of the substance.

Eye irritation  
: No eye irritation, Not tested on animals  
Not expected to cause eye irritation based on expert review of the properties of the substance.

Skin sensitization  
: Not tested on animals  
Not expected to cause sensitization based on expert review of the properties of the substance.

There are no reports of human respiratory sensitization.

Repeated dose toxicity  
: Inhalation  
Rat - gas  
NOAEL: 233 mg/l, 50,000 ppm, No toxicologically significant effects were found.

Inhalation  
Rabbit - gas  
NOAEL: 2.33 mg/l, 500 ppm, No toxicological effects warranting significant target organ toxicity classification were seen below the recommended guidance values for classification.

Inhalation  
Mini-pig - gas  
NOAEL: 50 mg/l, 10,000 ppm, No toxicologically significant effects were found.
### Carcinogenicity
Not classifiable as a human carcinogen. Sufficient data are available to conclude that the substance is not expected to be carcinogenic.

### Mutagenicity
Animal testing did not show any mutagenic effects. Did not cause genetic damage in cultured mammalian cells. Experiments showed mutagenic effects in cultured bacterial cells.

### Reproductive toxicity
No toxicity to reproduction. Animal testing showed no reproductive toxicity.

### Teratogenicity
Animal testing showed effects on embryo-fetal development at levels equal to or above those causing maternal toxicity.

### Further information
Cardiac sensitisation threshold limit: > 559509 mg/m³

### 1,1,1-Trifluoroethane (HFC-143a)

</tbody>
</table>
Teratogenicity: Animal testing showed effects on embryo-fetal development at levels equal to or above those causing maternal toxicity. Information given is based on data obtained from similar substances.

Carcinogenicity: The carcinogenicity classifications for this product and/or its ingredients have been determined according to HazCom 2012, Appendix A.6. The classifications may differ from those listed in the National Toxicology Program (NTP) Report on Carcinogens (latest edition) or those found to be a potential carcinogen in the International Agency for Research on Cancer (IARC) Monographs (latest edition).

None of the components present in this material at concentrations equal to or greater than 0.1% are listed by IARC, NTP, or OSHA, as a carcinogen.

SECTION 12. ECOLOGICAL INFORMATION

Aquatic Toxicity
Chlorodifluoromethane (HCFC-22)
96 h LC50: Zebra fish 777 mg/l
96 h EC50: Algae 250 mg/l
48 h EC50: Daphnia magna (Water flea) 433 mg/l

1,1,1,2-Tetrafluoroethane (HFC-134a)
96 h LC50: Oncorhynchus mykiss (rainbow trout) 450 mg/l
96 h ErC50: Algae 142 mg/l
72 h NOEC: Pseudokirchneriella subcapitata (green algae) 13.2 mg/l
48 h EC50: Daphnia magna (Water flea) 980 mg/l
Information given is based on data obtained from similar substances.

96 h ErC50 : Algae 142 mg/l
Information given is based on data obtained from similar substances.

72 h NOEC : Pseudokirchneriella subcapitata (green algae) 13.2 mg/l
Information given is based on data obtained from similar substances.

48 h EC50 : Daphnia magna (Water flea) 980 mg/l
Information given is based on data obtained from similar substances.

Difluoromethane (HFC-32)
96 h LC50 : Fish 1,507 mg/l
96 h EC50 : Algae 142 mg/l
48 h EC50 : Daphnia (water flea) 652 mg/l
30 d : NOEC Fish (unspecified species) 65.8 mg/l

Trifluoromethane (HFC-23)
96 h LC50 : Pimephales promelas (fathead minnow) 633.26 mg/l
96 h EC50 : Algae 154.54 mg/l
48 h EC50 : Daphnia magna (Water flea) 323.05 mg/l

2,2-Dichloro-1,1,1-trifluoroethane (HCFC-123)
96 h LC50 : Oncorhynchus mykiss (rainbow trout) 55.5 mg/l
96 h ErC50 : Pseudokirchneriella subcapitata (green algae) 96.6 mg/l
96 h EbC50 : Pseudokirchneriella subcapitata (green algae) 67.8 mg/l
48 h EC50 : Daphnia magna (Water flea) 17.3 mg/l

1-Chloro-1,1-difluoroethane (HCFC-142b)
96 h LC50 : Oncorhynchus mykiss (rainbow trout) 36 mg/l
48 h EC50 : Daphnia magna (Water flea) > 190 mg/l
1,1,1,3,3,3-Hexafluoropropane (HFC-236fa)
96 h LC50 : Zebra fish 292 mg/l
96 h ErC50 : Pseudokirchneriella subcapitata (microalgae) > 186 mg/l
48 h EC50 : Daphnia magna (Water flea) 299 mg/l

2,3,3-Tetrafluoropropene (HFO-1234yf)
96 h LC50 : Cyprinus carpio (Carp) > 197 mg/l
72 h NOEC : Algae > 100 mg/l
48 h EC50 : Daphnia magna (Water flea) > 100 mg/l

1,1,1-Trifluoroethane (HFC-143a)
96 h LC50 : Oncorhynchus mykiss (rainbow trout) > 40 mg/l OECD Test Guideline 203
96 h ErC50 : Pseudokirchneriella subcapitata (green algae) > 44 mg/l OECD Test Guideline 201
48 h EC50 : Daphnia magna (Water flea) 300 mg/l OECD Test Guideline 202

1,1,1,2,3,3,3-Heptafluoropropane (HFC-227ea)
96 h LC50 : Danio rerio (zebra fish) > 200 mg/l OECD Test Guideline 203 Information given is based on data obtained from similar substances.
72 h ErC50 : Pseudokirchneriella subcapitata (green algae) > 114 mg/l OECD Test Guideline 201 Information given is based on data obtained from similar substances.
72 h NOEC : Pseudokirchneriella subcapitata (green algae) 13.2 mg/l OECD Test Guideline 201 Information given is based on data obtained from similar substances.
48 h EC50 : Daphnia magna (Water flea) > 200 mg/l OECD Test Guideline 202 Information given is based on data obtained from similar substances.

This product has no known ecotoxicological effects.

Due to its physical properties, there is no potential for adverse effects.

NOEC Fish (unspecified species)

Due to its physical properties, there is no potential for adverse effects.

NOEC Daphnia (water flea)

Due to its physical properties, there is no potential for adverse effects.

Revision Date 01/13/2017

Ref. 130000120029

---

**Difluoromethane (HFC-32)**

- **Biodegradability**: 5 % OECD Test Guideline 301D
  - Not readily biodegradable.

**Trifluoromethane (HFC-23)**

- **Biodegradability**: Not readily biodegradable.
- **Bioaccumulation**: Bioconcentration factor (BCF) : 3.2
  - Bioaccumulation is unlikely.

---

**2,2-Dichloro-1,1,1-trifluoroethane (HCFC-123)**

- **Biodegradability**: 24 %
  - Not readily biodegradable.
- **Bioaccumulation**: Bioconcentration factor (BCF) : 33
  - Bioaccumulation is unlikely.

---

**1-Chloro-1,1-difluoroethane (HCFC-142b)**

- **Biodegradability**: Not readily biodegradable.
- **Bioaccumulation**: Bioaccumulation is unlikely.

---

**1,1,1-Trifluoroethane (HFC-143a)**

- **Bioaccumulation**: Information given is based on data obtained from similar substances.

---

**Perfluoropropane (FC-218)**

- **Biodegradability**: Not biodegradable
  - Not readily biodegradable.

---

**Dichlorodifluoromethane (CFC-12)**

- **Bioaccumulation**: Bioconcentration factor (BCF) : < 10
  - Bioaccumulation is unlikely.

---

**1,1,2-Trichloro-1,2,2-trifluoroethane (CFC-113)**

- **Bioaccumulation**: Bioconcentration factor (BCF) : 11 - 86
  - Bioaccumulation is unlikely.

---

**1,2-Dichloro-1,1,2,2-tetrafluoroethane (CFC-114)**

- **Biodegradability**: Not readily biodegradable.
Bioaccumulation : Bioaccumulation is unlikely.

Perfluoroethane (FC-116)
Bioaccumulation : Bioaccumulation is unlikely.

n-Butane (HC-600)
Biodegradability : 100 %
Readily biodegradable

Pentane (HC-601)
Biodegradability : 71 %
Readily biodegradable

Bioaccumulation : Bioconcentration factor (BCF) : 171
Bioaccumulation is unlikely.

2-Methylbutane (HC-601a)
Biodegradability : 71.43 %
Readily biodegradable

Bioaccumulation : Bioconcentration factor (BCF) : 171
Bioaccumulation is unlikely.

Alkylated Benzene
Biodegradability : 60 % OECD Test Guideline 301
Readily biodegradable

Bioaccumulation : Bioconcentration factor (BCF) : 35
Bioaccumulation is unlikely.

Polypropylene Glycol, monobutyl ether
Biodegradability : 79 % OECD Test Guideline 301
Readily biodegradable

Bioaccumulation : Bioconcentration factor (BCF) : 3.16
Bioaccumulation is unlikely.

Distillates (Petroleum), clay treated heavy naphthenic; base oil unspecified
Biodegradability : Not readily biodegradable.
Used Refrigerants and Refrigerant Blends

SECTION 13. DISPOSAL CONSIDERATIONS

Waste disposal methods - Product: Comply with applicable Federal, State/Provincial and Local Regulations.

Contaminated packaging: Dispose of contents/container to an approved waste disposal plant.

SECTION 14. TRANSPORT INFORMATION

DOT

UN number: 1078

Proper shipping name: Refrigerant gases, n.o.s. (Fluorinated Hydrocarbons)

Class: 2.2

Labelling No.: 2.2

Reportable Quantity: 10 lbs Chlorotrifluoromethane

IATA_C

UN number: 1078

Proper shipping name: Refrigerant gas, n.o.s. (Fluorinated Hydrocarbons)

Class: 2.2

Labelling No.: 2.2

IMDG

UN number: 1078

Proper shipping name: REFRIGERANT GAS, N.O.S. (Fluorinated Hydrocarbons)

Class: 2.2

Labelling No.: 2.2

The above shipping information applies to all the Used Refrigerants and Refrigerant Blends except Used

53 / 55
Refrigerant 11, Used Refrigerant 113, and Used Refrigerant 123. These 3 blends are not classified as dangerous in the meaning of transport regulations.

SECTION 15. REGULATORY INFORMATION

| SARA 313 Regulated Chemical(s) | 2,2-Dichloro-1,1,1-trifluoroethane, 1-Chloro-1,1-difluoroethane, Trichlorofluoromethane, Dichlorodifluoromethane, Chlorotrifluoromethane, Chlorodifluoromethane, 1-Chloro-1,2,2,2-tetrafluoroethane, Cryofluorane |
| PA Right to Know Regulated Chemical(s) | Substances on the Pennsylvania Hazardous Substances List present at a concentration of 1% or more (0.01% for Special Hazardous Substances): Trifluoromethane, 1-Chloro-1,1-difluoroethane, Trichlorofluoromethane, Dichlorodifluoromethane, Chlorotrifluoromethane, Carbon tetrafluoride, Chlorodifluoromethane, Cryofluorane, Difluoromethane, Propane, Butane (<0.1% butadiene), Isobutane (containing ≥ 0.1 % butadiene (203-450-8)), Isobutane (<0.1% butadiene), Pentane, 2-Methylbutane |
| NJ Right to Know Regulated Chemical(s) | Substances on the New Jersey Workplace Hazardous Substance List present at a concentration of 1% or more (0.1% for substances identified as carcinogens, mutagens or teratogens): Isobutane (<0.1% butadiene), Pentane, 2-Methylbutane, Trifluoromethane, Perfluorooctane, 2,2-Dichloro-1,1,1-trifluoroethane, 1-Chloro-1,1-difluoroethane, Trichlorofluoromethane, Dichlorodifluoromethane, Chlorotrifluoromethane, Carbon tetrafluoride, Chlorodifluoromethane, 1-Chloro-1,2,2,2-tetrafluoroethane, Cryofluorane, 1,1,1-Trifluoroethane, 1,1-Difluoroethane, Difluoromethane, Octafluoropropane, Propane, Butane (<0.1% butadiene), Isobutane (containing ≥ 0.1 % butadiene (203-450-8)) |
| CERCLA Reportable Quantity | 1 lbs |
| Based on the percentage composition of this chemical in the product. |
| Chlorotrifluoromethane |
| California Prop. 65 | WARNING! This product contains a chemical known to the State of California to cause birth defects or other reproductive harm. Carbon monoxide |
